IIP Persons who are troubled with their eyes and are compelled to wear glassee, would do well to call on Mr. Waldstein, the Optician, from New York, who has rooms at Downing's new Block, opposite the Atlantic House. Ho has had dinny years experience in this business, and thoroughly understands the nature of the eye and its defects: and will adapt a glass to the sight with admirable precision. We are wearing a pair of his glasses, and can, therefore, speak of their merits from experience;-He will remain in town but a few days longer, and those who wish to avail themselves of his visit should call mon him immediately.

MELANOROLY SIGHT.-Dr. Reid, in traveller through the highlands of Peru, found lately in the desert of Atacama the dried remains of an assemblage o human beings, five or six handred in number, men, women and children, scated in a semi-circle as when alive, and staring into the burning waste before them. They had not been buried; life had not departed before they thus sal around; but impe was gone; the Spanish invader was at hand, and, no escape being left, they had come hither to die. They still sit immoveable in that dreary desert, dried like mummies by the effeet of the hot air; they still keep their position, etting up as in solemn couned, while over that dread Arcopagua silence broods everlastingly.

#### 4 days later from Europe.

The steamship Arctic, Captain Luce, which sailed from Liverpool on the 30th ultima, arrived at her wharf, loot of Canal street, Monday morning, at about half past 7 o'clock, thus having accomplished the trip in 11 days and about 19 igura.

By this arrival we have news from all parts of Europe, four days later than receired by the Europa.

Tho news is of considerable interest. Cotton has advanced, in the Havre Market, 2 Iranes.

The accounts of the state of trade in the provinces during the past week are again fivorable. At Nottingham there is increasing activity in the late mamfacture, owing to foreign orders consequent on the Grent Exhibition.

There has also been a partial revivaj in horiery and a diminution in the large number of persons driven, by the recent improvements in machinery, to apply for relief. In the clothing districts there has been no particular alteration.

The weekly reports from the American and Rotterdam produce markets state that business was less animated .--The demand for coffee was confined to purchases for immediate consumption, and in refined sugar, contracts had been completed at rather low prices. Prices had slightly improved; rice was steady, and indigo continued to be well support-

The American steamship Baltic Capt. Comstock, arrived in the Mersey on the evening of the 26th. The B, left New York at noon on the 19th, and therefore accomplished the trip in a few hours over ten days.

## DENMARK.

The Senate of Hamburg has placed severs and almost prohibitive restrictions on the transport of emigrants by the agents of British shipowners. The Senate has also requested the Prussian government to adopt similar restrictive and hostile measures, and it is stated that the city of Bremen proposes to follow the example set by the city of Hainburgh. Our correspondent laments that the British Consul and Vice Consul at Hamburgh should have allowed these measures to pass without the most strenuque opposition.

Romance in Real Life.—The Potomac Sentinel says that some twentyfive years ago, Jacob McKimmy, of that place, married a Miss -residing together, rather unhappily, as man and wife, for some years, and after and McKimmy joined the U. Mrs. McKimmy supposing her husband dead, about twelve years ago married a Mr. Thornburg, an industrious and wellnumber of children. On Saturday last, McKimmy, after an absence of twenty years, returned to claim his wife, covered with scars and wounds received in the Mexican war. Under all the circomstances, as his children are both dead, the recommendation of the Sentinel that Mr. McKimmy should retire for another twenty years, is undoubtedly very good:
